

Hoyl Model Responsible Portfolio 5

As of 30/06/2025

INVESTMENT OBJECTIVES AND POLICY

The investment objective of the Model is to generate income and capital growth over the medium to long term. The underlying funds focus on companies delivering a positive net benefit to society and the environment, exclude companies with negative social or environmental impacts and seek to improve corporate behaviour.

The Model will seek to achieve its objectives by investing in collective investment funds which will provide exposure to a diversified portfolio. The Model will have a minimum exposure of 30% to assets such as fixed interest investments (such as bonds, which may be government or corporate and vary in terms of investment grade credit ratings, including sub-investment grade to a limited extent) and between 20% and 60% exposure to higher risk assets such as equities (and to an even lesser extent, alternatives such as property, infrastructure and commodities).

SNAPSHOT

Model Comparator	The Investment Association (IA) is the trade body of the UK investment management industry. It classifies funds into a number of sectors based on their characteristics. The comparator for Hoyl Responsible Model Portfolio 5 is: IA Mixed Investment 20%-60% Shares
